DETAILED ACTION

Allowable Subject Matter

Claims 1-21 are allowed.

The following is an examiner's statement of reasons for allowance:

With respect to claims 1-7, and 10-21, the prior art alone or in combination does not teach the limitation of a sintered body electrode for capacitors comprising a value obtained by dividing the difference between the volume measured in a vacuum, which are determined according to the Archimedes method, which is a method for determining the density of a sample using Archimedes' principle that the buoyancy which a solid in liquid receives is equal to the mass of liquid having the same volume of the solid, by the volume measured under atmospheric pressure is 11% or less.

With respect to claims 8-9, the prior art alone or in combination does not teach the limitation of a method for producing a sintered body electrode for capacitors comprising a value obtained by dividing the difference between the volume measured in a vacuum, which are determined according to the Archimedes method, which is a method for determining the density of a sample using Archimedes' principle that the buoyancy which a solid in liquid receives is equal to the mass of liquid having the same volume of the solid, by the volume measured under atmospheric pressure is 11% or less.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably Application/Control Number: 10/552,589
